

Subject: ALARA (As Low As Reasonably Achievable)	Effective Date: Sept. 13, 1991	Initiated by: Associate Director for ES&H/QA
	Supersedes: New	Approved: Director

It is the policy of the Princeton Plasma Physics Laboratory to conduct its operations and research in a manner such that the health and safety of employees, the environment, and the public are protected. Princeton Plasma Physics Laboratory management is committed, in all its activities, to reduce any safety or health risks associated with hazardous substances and ionizing radiation to levels that are as low as reasonably achievable (ALARA). Both individual and collective exposures shall be maintained as far below DOE and PPPL administrative limits as social, economic, practical, and public policy considerations permit.

The Princeton Plasma Physics Laboratory ALARA Plan is the implementing document which shall be used by line management to ensure that worker and public exposures are consistent with this policy.
