

Intro to Fusion & Plasma

Princeton Plasma Physics Laboratory

Join us for the 2022 Introduction to Fusion Energy and Plasma Physics Course

During the weeks of **June 13-24 2022 (12PM-5PM ET daily)**, PPPL will virtually host an introductory course on fusion energy sciences and plasma physics. The course is targeted at undergraduate students interested in fusion energy science and plasma physics and is open to public at large.

Registration is **free** and participants that attend the full course will receive a certificate of completion.

Content will reflect the broad research under the Fusion Energy Sciences and Plasma Physics umbrella, including discovery plasma sciences, magnetic fusion energy, fusion materials and technology and high energy density plasmas.

For more details and course registration, please visit us at suli.pppl.gov
