

“The Princeton Plasma Physics Laboratory recognizes the contributions of small businesses to our economy, and acknowledges and accepts the responsibility to foster and help sustain a vibrant, diverse, and economically viable business supplier community. It is the policy of Princeton University in its operation of PPPL to extend the maximum practicable opportunity to participate in subcontracting to any small business, small disadvantaged business, women-owned small business, HUBZone small business, veteran-owned small business, small business concerns owned and controlled by socially and economically disadvantaged individuals, and service disabled veteran-owned small business. All PPPL staff who have a role in the decision process for creating and approving subcontracts are responsible for expending reasonable efforts to achieve our small business goals, as the development of all types of small business is a worthwhile social and business endeavor and enjoys the full cooperation of all PPPL staff who have a role in creating or approving subcontracts.”

Richard Hawryluk (Interim Laboratory Director)
